double output to
5-nozzle volute, orchards,
row crops, Christmas
trees, nurseries, vineyards,
vegetables, foliar feeding

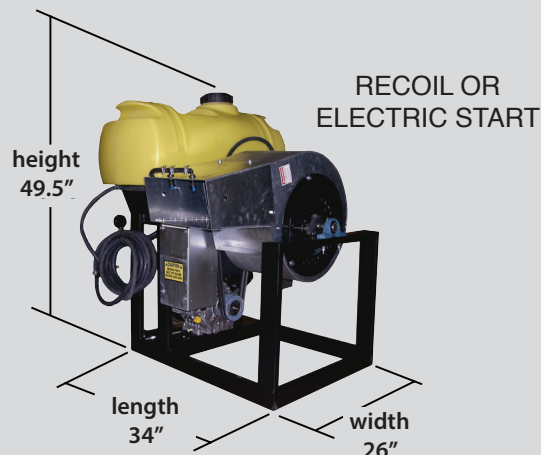

10-Dual Volute
orchards, vineyards,
Christmas trees,
one pass hits both
sides of crop

8-Vegetable Volute
vegetables,
low growing vine crops,
foliar feeding

THE LITTLE HERCULES

The Little Hercules is small but don't let it's size fool you - it is very powerful. It is equipped with a 9.5 HP Kohler engine which produces a powerful air blast.

This unit will fit into almost all utility vehicles. This means you will have the flexibility to maneuver in & around tight obstacles. It's light enough that it can easily be moved from one vehicle to another.

Engine Model Features

Drive Type:	9.5 HP Kohler Engine
Fan Sizes Available:	12" Galvanized Centrifugal
Direction Control:	275 Degrees of total rotation
High-quality Hypro pump:	4-roller
Tank Size:	25 Gallon
Dry Weight:	240 lbs. recoil start, 350 lbs. electric start

Electric Start Model Features

- Electric engine start
- Remote electric fan rotation for controlling direction of the spray
- Electric valve - shuts off spray with flip of a switch

PTO SPRAYER

Perfect for compact to medium size tractors with category 1 and 2 hitch. With optional accessories you can adjust direction of spray and be able to shut off spray from seat of tractor. The compact size does not take up much space. Comes in a number of volute options and tank sizes to suit your individual needs.

PTO Model Features

Drive Type:	540 RPM Tractor PTO
PTO Horsepower:	12 to 18 HP
Fan Sizes Available:	12", 15"
Direction Control:	275 Degrees of total rotation
High-quality Hypro pump:	4-roller, 6-roller, centrifugal
Tank Size:	55, 110 and 150 Gallon
Dry Weight:	390 to 470 lbs.

PTO Model Accessories

- Electric valve - shuts off spray with flip of a switch
- Hydraulic fan rotation for controlling direction of the spray

COMMON MIST SPRAYER APPLICATIONS:

- Livestock insect control
- Orchards
- Christmas Trees
- Vineyards
- Hard-to-access locations (steep inclines & fence rows)
- Vegetables
- Melons, pumpkins, & other vining plants
- Pecans
- Cotton (great for Boll Weevil control)
- Golf courses & other municipalities - fertilization & pest control
- Dairies
- Feed lots
- Nurseries
- Mosquito control

WHY USE AN AIR-BLAST MIST SPRAYER?

Mist sprayers offer a great solution to get a complete coverage in the most difficult applications. The air-blast mist sprayer generates a high-velocity air stream turbulently mixing a fine chemical mist with air. Conventional sprayers use a chemical and water solution. Our products produce a chemical/water and air mixture which is more cost-effective because you get a more efficient coverage of your crops.

- Very versatile. Can be used for different applications.
- Less water to haul means less fuel to consume.
- Air mixtures require less labor than conventional sprayers.
- Lower initial cost, less maintenance and easy to operate
- Lower costs mean higher profits
- Economical piece of equipment
- 10-year frame / 3-year parts warranty

SPRAY

INNOVATIONS

Our mission is to service our customers during the sale and throughout the life of the product.

*This is why we offer a
3-YEAR all parts
10-YEAR frame
WARRANTY
on all sprayers we sell.*
